

Simulator planning software that makes every slot count.

Bring training demand, simulator capacity and qualified instructors into one connected plan. See what you can deliver, make better use of your resources and stay ahead as things change.

THE CHALLENGE

Complex demand. Complex capacity.

Different training requirements, regulations and devices create a complex mix of demand. Add instructors with different qualifications, availability and locations, and building the best possible plan gets complicated fast. Great planning teams are already working all of this out. Aeroplanned makes it easier to get to the answers you need, with everything pulled together and visible across the operation. Your team can spend less time building and rebuilding the numbers, and more time making the decisions that matter.

WHAT YOU GET

- **Model complex demand**
Capture different training requirements accurately, however complex the mix.
- **Set clear targets**
Turn budgets and plans into targets you can track throughout the operation.
- **Reduce unnecessary movement**
Plan ahead to minimize instructor travel and movement between bases.
- **Plan future capacity**
See the simulators and qualified instructors you'll need months and years ahead.
- **Maximize instructor utilization**
Plan instructor use across different qualifications so capability is available where it's needed most.
- **Identify gaps early**
See where training isn't covered while there's still time to do something about it.

HOW AEROPLANNED WORKS — THE THREE LEVELS OF PLANNING

STRATEGIC

Set the direction

Training demand and planned capacity, balanced for best possible results.

TACTICAL

Make it achievable

Training plans, instructor qualifications, device availability and customer bookings in place, adjusted as the real world hits.

OPERATIONAL

Deliver it, in priority

Every trainee, instructor and device ready to go.

"With Aeroplanned, we're ready to use our current and new assets more efficiently, from the Elixir fleet to the A320 simulator."

Captain Dylan van Haasen

Head of Training, OATC – Omni Aviation Training Center

TRUSTED BY LEADING FLIGHT TRAINING ORGANIZATIONS

See it in your operation.

Book a walkthrough tailored to your training setup — a real Aeroplanned environment, not a slideshow.
